**SAFETY TIP**

**LIFE VESTS**: Get a good, comfortable life vest and WEAR IT! A life vest does you little good stored on your boat, especially if you get tossed into the water and away from your boat. Accidents happen and by their nature, they happen when you are not prepared. A life vest can keep you afloat until you can rescue yourself or you can be rescued by others. In the worst cases when injuries or cold water are involved, your life vest can make all the difference! Be sure everyone onboard your boat wears a life vest too! Pass the word! Federal law now requires that all persons below the age of 13 must wear a life jacket while aboard a boat.

SAFETY FLAG
Be Seen! When out on your kayak, you are very low to the water. Add to that any wave or swell action and you are often hidden from other boaters view. The 4’ tall safety flag will help other boaters see you. Very important in areas with mixed boating traffic! For mounting in areas with internal access, you can use large washers and the provided nuts for mounting. Otherwise, in areas with no internal access, use the mount which includes bolts and well nuts.

Lightweight, easily portable yet with durable construction of high grade plastic paddle and anodized aluminum shaft. Corrosion resistant design. Floats too!

SAFETY WHISTLE
A must while on the water! You simply cannot beat the attention grabbing shrill of a whistle. A whistle can save your life! Keep one attached to your PFD in case of overboard emergency. Alert approaching vessels. Alert other boaters or people ashore that you need help.

Now you can make your Hobie MirageDrive a SUPER PERFORMER!

PERFORMANCE FINS - ST OR ST TURBO!

The Hobie MirageDrive is the most amazing propulsion system ever seen! But there is more!

Increase your performance or increase your fitness routine, you choose the fin that is right for you: Standard, ST or ST Turbo... low, medium or a higher gear! The standard fins, supplied with our kayaks, are the easiest pedaling fins, but some users feel that the standard fins do not offer enough resistance. This is very evident when using a sailing kit. The added power and speed of the sail often outpaces the standard fins (similar to pedaling a bike down hill in first gear).

Want to go really fast? Add ST TURBOs. Hobie Mirage kayak users report as much as 10% increase in speed and more using ST TURBO Fins. But its not all about speed, you can get top end speed and a slower cadence for cruising (Less pedals per mile). All achieved with these larger and more efficient fin designs. These longer fins can also increase lateral resistance for sailing upwind.

The ST (Square Tip) designs will require a bit more effort to pedal. The added effort is commonly compared to pedaling a bike up a slight incline. In addition, the included fin tension screw allows adjustment to achieve lower end torque or top end speed to meet the desires of the pedaler.

ST TURBO FINS & KITS

Kits come with 2 fins & 2 longer masts (available for V1 or V2 drives)

MIRAGEDRIVE SPARE PARTS KITS

Spare parts kits include a fin, mast, sprocket, chain and appropriate parts for the drive version. Older drives have sprockets and masts that use a set screw connection. V2 drives use threaded sprockets and masts. All in a handy zippered pouch. Don’t waste a day on the water when your MirageDrive could be easily repaired. Available for the standard fin drive or a drive with the ST Turbo fins. Standard kit shown.

MIRAGE KAYAK SAIL RIG
Add sail power to Hobie Mirage Kayaks! (Fits all current models of Hobie Mirage Kayaks). Paddle kayaks do not have the necessary lateral resistance needed nor do they typically have a rudder for steering. Paddle kayaks require hands-on paddling which prohibits use of rudder and sail controls for sailing. Hobie Mirage kayaks are equipped with a hand-controlled rudder. The MirageDrive allows hands to be free for sail and rudder controls. The Patented MirageDrive pedal system allows you to pedal while sailing which also helps you to maintain forward motion through turns and obtain higher speeds. Sail with ease maintaining excellent speed with or without pedaling while sailing. Easily pedal out to sail or pedal home when the wind is too light. Add a SideKick ama kit for additional stability if desired. The MirageDrive pedal system’s fins act as a keel or centerboard when in the down position offering the lateral resistance needed for upwind sailing. **SAIL KIT includes** mast*, sail (20.25 sq ft.), lines, fittings and storage bag. (*2 Piece mast standard / 4 Piece mast for i-Series)

Add the large rudder #81397001 for more responsive rudder control. Adventure models can add the dagger board for enhanced upwind performance.

**ROLLER FURLING KIT**
This is the ultimate for easy operation of a Hobie Mirage sail kit. Start with the sail rolled around the mast. When you are ready... un-furl to expose the sail or leave a little rolled on the mast to test the wind! By partially unrolling the sail, you are “reefing” some of the sail for better control and stability. If you are ready for full power... roll it all out! Such a great addition to our VERY popular sail accessory. Fits any previously sold Hobie Mirage sail kit (not for i-Series kayaks due to their stayed rig). Heading back to the beach? Roll the sail up tight on the mast and beach or dock the kayak with ease. The rolled sail will fit in current full-length sail bags. Hardware is easy to install and removal of the sail and control lines is simple for storage.

AIR-FLOW TELS
Trim your sails for optimum performance. Attached air flow over sails is critical. Air flow directions are indicated by these tell tails. Made of light weight rip stop nylon (Red / Green). Attaches to sails with waterproof adhesive disks. 334 SET OF 14

RONSTAN GLOVES
‘Amara’ synthetic leather for maximum durability, minimum stretch and shrinkage. Double Aramid stitching in high wear areas. Double thickness palm and fingers for protection and grip. UVF 50 (Ultra-Violet Protection Factor). Mesh panels for flexibility, comfort and quick drying. Low cut neoprene wrist band for secure fit and clear access to start watch. Sticky gloves reduce fatigue by minimizing the physical effort required to hold rope. (xx = size XS/SM/M/L/XL)

HOBIE GLOVES
Protect your hands while increasing your grip strength. Gloves add grip strength on lines which can ease up on the amount of force you need to exert. Available in small, medium, large & extra-large. (xx = size) 3188xx HOBIE GLOVE

SAILING TIP!
SAIL POWER: Watch the sail, pay close attention to the trim or adjustment of the sail. When the front of the sail, just behind the mast, luffs or flutters in the breeze, you lose power. To start moving, pull the sail in just enough to stop the sail from luffing or turn the boat away from the direction the wind is coming from. There are also short ribbons hanging on either side of the sail called “tell tails”. The tell tails react to the air flowing over the sail and will help you see that the sail is pulled in too tight or too loosely. If you pull the sail too tight you will stall the sail power. The tell tail on the back side of the sail will drop or do circles. Ease the sail out until it luffs, then pull it in just a little until it stops luffing. You will adjust the trim whenever the wind changes direction or you change course.
**SIDEKICK AMA KIT**

Whether you are a pro or a novice, you will enjoy the stability of the SideKick ama kit. Great for use when sailing, fishing, standing when site fishing, diving or shooting photos! SideKick ama kit is simple, light weight and effective! Floats are inflatable.

The SideKick's cross arms adjust the float height with a simple “click-twist-click”. Just like a paddle shaft adjustment. Three positions offer you high - medium - low positions. Set the floats high for cruising (less drag) or secondary stability. Use the medium or low settings for primary stability (less initial roll). Fine adjustments for float height are done by twisting the main crossbar within its mounts and tensioning with the fastening hardware.

Set up and use right off the beach or disassemble and deflate to store inside the hull. Then assemble and inflate when you get to your dive or fishing spot. Inflation is simple. Just blow a few breaths into each float through their one-way valves. Valve cap unscrews for rapid deflation. Installs with 4 bolts using expanding nuts. Not for use on Pro Angler models.

HOBIE DODGER

The Hobie Dodger is a spray, cool breeze or sun shade for your lower body. Deflect bow spray, block cool breezes and stay warmer in cold conditions.

Works like a small pop-up tent. Loops of bungee connect to the boat via small fittings installed along the rails. Small internal battens give the Dodger its shape. The Dodger extends aft to just in front of the pedaler. A Velcro strip seals up the center in front of the pedaler. The entire dodger folds forward to enter or exit the kayak, to make pedal adjustments or reach items in the cockpit. An access panel is built in for using the sailing rig. A great combination when there is wind and spray!

Great for hunters, animal and bird watchers as the Dodger conceals your legs movement. The Hobie Dodger makes your kayak a sit-inside sit-on-top!

Installs in minutes initially, but installs in moments once the fasteners are in place. Packs away into a small slow bag.

Fits the Hobie Mirage Pro Angler.

The handle makes it easier to insert or remove the cart under the boat or pull along when un-loaded. The handle also acts as a “kick-stand” to keep the cradle upright during loading. The handle and wheels are easily removable for storage. The Pro Angler / Universal dolly will fit a wide variety of Hobie Kayaks including Pro Anglers, Outback and Oasis. Cross straps secure the cover on your hull for windy conditions. Heavy duty UV resistant canvas material in a neutral color for better aging. These covers fit over the hull when upright or upside down. To help prevent distortions to the hull bottom shape, Hobie recommends that our kayak hulls be stored upside down resting on the cockpit rails. This is also best for deflecting rainwater and prevents water pooling in the cockpit or on the cover. When planning to store a hull upright, be sure to properly support the hull bottom to prevent hull distortions.

HOBIE TWIST AND SEAL HATCHES

TWIST AND SEAL HATCHES have a better seal. The lids also hinge open, so you never lose the lid. Designed with a cork-screw-like mechanism for closure, a simple twist of the handle opens or closes the hatch. As the screw pulls down the hatch, you get a tight seal on the “O Ring” seal against the inner cylinder. The hatch seals around the edge of the cylinder and does not have to be held down against a flat surface to seal. This allows the hatch to seal even if the lid is partially open or tipped. Flip the handle into the recess to “lock” it closed. Available in 6” and 8” diameters. These hatches are now standard equipment on all Hobie Kayaks.

*Retrofit kits include gaskets (and 2 ea #8031130 screws for the 8”).

HOBIE eVOLVE POWERED BY TORQUEEDO

Whether you're augmenting your MirageDrive or using the Hobie eVolve as your primary power source, this quiet and efficient electric motor will dramatically expand your horizons. Maybe there's a ripping tidal current or a series of fast-flowing eddies that you must negotiate before reaching that pristine shoreline. Maybe it's a bay that's always been a little too far explore. Or maybe it's just been a long day and your tired muscles could use a break. Either way, the clean, quiet, eVolve system is there for you.

This tidy German-engineered electric motor kit fits any MirageDrive kayak and it comes with two mounting options—one midship, the other stern hung. With the Hobie eVolve, you can either maintain steady cruising speeds of two knots (motor only) for hours, or you can open the throttle for short sprints. Best yet, depending on your set-up, you can use the eVolve to augment your boat speed while also using your MirageDrive. And thanks to its cockpit-mounted Remote Throttle, you always know how much juice you have left in the system's 320 Wh Lithium-Manganese battery. Runtime estimated as 8 hr 20 min at 2.6 mph / 48 min full throttle.

If you thought the MirageDrive made kayaking sweeter, wait until you try the eVolve system. The eVolve offers increased battery capacity, longer range and solar charge / run capability. Life only improves with power.

**GEARTRAC**

Add a whole new level of versatility to your kayak with GearTrac from YakAttack! GearTrac makes your kayak not only adjustable, but fully configurable, enabling you to change your setup from one outing to the next. Trolling for kings today? Fly fishing tomorrow? Duck hunting next weekend? GearTrac gives you the ability to go from a fully rigged kayak fishing machine to a flat deck in minutes.

You’ll never look at tracks the same way again. Of course you can attach to your kayak, but how about your milk crate? What about organizing your accessories in your truck or garage?

Take it to another level by attaching a YakAttack MightyMount to the back of the track (yes - we matched up the hole patterns). Attach a Screwball to the MightyMount and your GearTrac becomes a fully articulating, remote platform.

**PANFISH CAMERA MOUNT**

Getting your camera pointed in the right direction just got a little easier. The PanFish™ by YakAttack™ features a split mast design with adjustable friction disks that allow quick and easy horizontal panning. Just grab the foam grip above center mast and rotate. Nothing to loosen, nothing to get loose. Just point and let go.

The PanFish™ was designed for over-the-shoulder video with lightweight cameras. We recommend a maximum payload of 1 lb, including camera and housing (if applicable). This covers most lightweight and point-and-click style cameras.

**PANFISH PORTRAIT**

A picture says a thousand words, so keep it short and sweet with the PanFish Portrait™!

Designed for mounting in front of the paddler, the low profile of this full featured camera mount keeps it out of your way but readily available for trophy pictures or reverse angle video of the big fight.

The pivoting head can be positioned at any angle in the horizontal plane. This creates the perfect scenario for “hero” shots.

1) Rotate LCD towards you
2) Navigate your camera’s menu to set the delay timer
3) Rotate lens towards you, pick up your fish before timer fires
4) Perfect hero shot!

This same process can be used for taking Catch-Photo-Release photos while holding the fish securely to the measuring board and getting your mug in the shot to boot!

The PanFish Portrait™ was designed for a maximum payload of 2 lbs, making it ideal for reverse angle video with “heavier” cameras.

TECH TIP!

“WELL NUT” FASTENERS are tubular rubber fittings with an imbedded brass nut in the base. These are similar to a molly screw commonly used in sheet rock. They expand within the structure and give you a virtual backing nut and washer in an area that is inaccessible. Well nuts can be used for mounting many accessories to kayaks. Simply drill a hole as a net-fit dimension for the well nut. Insert the nut and position the hardware to be fastened. Insert and thread in the screw. Tighten until very snug. The brass nut is drawn up against the inside surface of the kayak which expands the rubber to a dimension that is too large to pull through the hole.

HOBIE KAYAK FAQ

How watertight is my boat? It is normal for any type of kayak to experience a small amount of seepage due to the installation of rivets, hatches, etc. Kayaks may take on a few cups of water while out paddling. If a kayak is taking on more than a small amount of water, check to make sure the drain plug is in, then check the rest of the boat for leaks. Silicone can be used to seal the rivets. If you have any questions, please call your dealer.

Is my boat repairable? Hobie kayaks are very durable, however, on occasion they may need some minor repairs. Linear polyethylene is repairable. Check with your dealer concerning repairs for your kayak.

Is my boat recyclable? Hobie will recycle your boat when you are done with it. To recycle a Hobie Kayak, it must be cut up so it fits in a box with the following dimensions: may not exceed 130" for the length plus girth, and maximum 108" for the length. Ship the boat to: Hobie Cat 4825 Oceanside Blvd. Oceanside, CA 92056.

How should I store my kayak? It is best to store your kayak upside down or standing on end. If hanging your kayak, do not support from the handles. Best supported by wide webbing straps with the kayak upside down or on its side.
